

For links to the app and an instructional video, please visit <http://www.tkl-safeandsound.com> or scan this QR code:

Install Card for TKL Safe and Sound:

1. Download the Humiditrak app from the iTunes or Google Play Store and create your account using the “Sign-Up” button.
2. To link your Safe and Sound sensor to your smart phone:
 - ✦ Rotate the top of the sensor counterclockwise to remove it from its base (which is permanently embedded into the guitar case)
 - ✦ Pull the battery tab label from the device
 - ✦ Wait for the light to blink 4 times
 - ✦ Gently and securely rotate the sensor clockwise back onto its base
3. On the Humiditrak app screen, Press the + (plus) sign in the upper right corner, then place your phone next to the Safe and Sound sensor to link the sensor to the app.
4. Once connected, the App will prompt you to enter a few details about your guitar, including Name, Brand and Model. You can then optionally enter additional details like Serial Number, Purchase Date and Estimated Value by selecting Details from the main menu.
5. Your sensor will begin collecting temperature and humidity data immediately, even if it does not show up right away. The Humiditrak app displays data on an hourly, daily, and monthly basis, with the opportunity to scroll back to look at historical data.
6. You can set and adjust the temperature and humidity Alert parameters by selecting Settings from the main menu of the App. Please refer to the manufacturer’s guidelines to find the recommended temperature and humidity ranges for your specific guitar.
